ABSTRACT

This 1988-1989 edition of Association of College and Research Libraries (ACRL) statistics presents data from 114 U.S. and Canadian libraries that are not members of the Association of Research Libraries (ARL), and are not covered by the annual ARL statistics. This edition is published every 2 years. The 114 non-ARL libraries that returned questionnaires for this report (91.5%) were classified by the revised Carnegie classification as "Research Libraries" I and II and Doctorate Granting Colleges and Universities I and II, and included seven Canadian university libraries with similar scope and mission. The participating libraries reported holdings of 92,635,350 volumes and expenditures of $158,308,733 for the purchase of library materials. Nearly 11,581 people are employed by these libraries (2,984 professional, 5,468 support staff, and 3,102 full-time equivalent student workers). Data are provided in the areas of collections, serials, expenditures, enrollment, personnel, and interlibrary loan, and are presented in 17 tables ranking the order of each of the participating libraries for materials and collections (volumes, serials, microform); salaries and other operating expenses; circulation; number of library personnel, including the number of Ph.D. degrees; and student enrollment figures. In addition to this publication, the data files are presented in dBASEIII+, standard spreadsheet, and ASCII format. No systems knowledge is required to convert files for manipulation using LOTUS or VisiCalc software packages. (MAB)

I. INTRODUCTION

The 1989 edition of the *ACRL University Library Statistics* presents data from 114 U.S. and Canadian university libraries. The figures reflect the condition of the libraries at the close of their 1989 fiscal year.

ACRL has conducted similar surveys every two years in even-numbered years since 1979. With the revitalization of the data gathering efforts of the federal government through the U.S. Department of Education *Integrated Postsecondary Education Data System* (IPEDS), ACRL can now coordinate its data gathering with IPEDS to ensure that statistics are gathered annually. Since IPEDS has begun biennial collection of data in even-numbered years, the ACRL Board of Directors felt that ACRL should shift its data gathering to odd-numbered years. To ensure continuity of data gathering, the ACRL Statistics Committee recommended and the ACRL Board agreed that data should be gathered this year rather than waiting until 1991.

The 1989 questionnaire was sent to all non-ARL libraries designated as Research Universities I and II and Doctorate Granting Colleges and Universities I and II in the 1987 Carnegie classification and to 7 Canadian university libraries with similar scope and mission. One hundred-fourteen completed questionnaires were returned and 5 libraries requested that their names be removed from the survey for a total response rate of 91.5%.

In addition to this publication, the data files are presented in dBASEIII+, standard spreadsheet, and ASCII format. No systems knowledge is required to convert files for manipulation using LOTUS or VisiCalc software packages.

Acknowledgements are due to the many volunteers who contributed to the success of this year's survey and data publication. The data published are those submitted by the libraries. No analysis was made of the completed questionnaires. The value of a survey of this nature is directly affected by the number of respondents which, this year, reached an all time high. Librarians from the 114 libraries spent much time and care in the preparation and submission of their data. The high response rate is partly attributable to a great deal of telephone follow up by ACRL staff and the members of the ACRL Academic Library Statistics Committee. Randy Meyer of the ACRL staff and Denise Bedford, graduate student in the Ph.D. program at the University of California, Berkeley, coordinated the receipt and tracking of completed forms. Denise Bedford, and professional colleague Suzanne Delahaie completed data entry, and generated data files and printed products, and statistical variables.

Our thanks to all.

ANALYSIS OF SELECTED VARIABLES OF UNIVERSITY LIBRARIES

The percentages and ratios below are intended to summarize the basic data in the ACRL Library Data Tables. The high and low figures indicate the range while the mean and median values give an idea of the average, or typical, value for ACRL's university library members.

	Category	High	Mean	Median	Low
1.	Professional Staff as a percent of Total Staff	44%	27%	26%	13%
2.	Nonprofessional Staff as a percent of Total Staff	76%	46%	46%	10%
3.	Student Assistant Staff as a percent of Total Staff	74%	28%	29%	3%
4.	Ratio of Professional Staff to Non-professional Staff (excluding student assistants)	2.3	0.7	0.6	0.2
5.	Ratio of Items Loaned to Items Borrowed	10.9	1.8	1.5	0.2
6.	Serials Expenditures as a percent of Materials Expenditures	89%	61%	62%	12%
7.	Materials Expenditures as a percent of Total Operating Expenditures	64%	39%	40%	15%
8.	Contract Binding as a percent of Total Operating Expenditures	4%	2%	1%	0%
9.	Salary and Wage Expenditures as a percent of Total Operating Expenditures	70%	49%	48%	32%
10.	Other Operating Expenditures as a percent of Total Operating Expenditures	24%	11%	10%	2%
11.	Unit costs of Monographs (per volume)	$92.86	$34.78	$33.10	$4.01
12.	Unit costs of serials (per title)	$334.41	$148.06	$141.70	$49.81

ACRL STATISTICS, 1988-89

Instructions for Completing the Questionnaire

1. Definitions of the statistical categories used in this questionnaire can be found in *American National Standard for Library and Information Sciences and Related Publishing Practices - Library Statistics*. Z39.7-1983. (New York, American National Standards Institute, 1983.)

2. The questionnaire assumes a fiscal year ending June 30, 1989. If your fiscal year is different, please provide a footnote on p. 4 of the questionnaire.

3. **Please do not use decimals.** All figures should be rounded to the nearest whole number.

4. **Please do not leave any lines blank.** If the appropriate answer is zero or none, use **0.** If an exact figure is unavailable, use **U/A.** If a question is not applicable to your library, use **N/A.**

5. In a university that includes both main and branch campuses, an effort should be made to report figures for the main campus only. (The U.S. National Center for Education Statistics in its Integrated Postsecondary Education Data System (IPEDS) survey described a **branch campus** as one "located in a community different from that of its parent institution ... beyond a reasonable commuting distance from the main campus ... The educational activities at the location must be organized on a relatively permanent basis ... and include course offerings for one or more complete college-level programs of at least one full year.") If figures for libraries located on branch campuses are reported, please provide an explanatory footnote on p. 4 of the questionnaire.

6. A **branch library** is defined as an auxiliary library service outlet with quarters separate from the central library of a system, which has a basic collection of books and other materials, a regular staffing level, and an established schedule. A branch library is administered either by the central library or (as in the case of some law and medical libraries) through the administrative structure of other units within the university. Departmental study/reading rooms are not included.

7. **Questions 1-6. Collections.** Use the ANSI Z39.7-1983 definition for **volume** as follows:

> a physical unit of any printed, typewritten, handwritten, mimeographed, or processed work, contained in one binding or portfolio, hardbound or paperbound, which has been cataloged, classified, and made ready for use.

Include duplicates and bound volumes of periodicals. Exclude microforms, maps, nonprint materials, and uncataloged items. Exclude government document volumes unless they are cataloged, classified, and shelved as part of the general collection. (Data on documents holdings are requested in the Supplementary Statistics questionnaire.) If any of these items cannot be excluded, please provide an explanatory footnote on p. 4 of the questionnaire. For purposes of this questionnaire, unclassified bound serials that are arranged in alphabetical order are considered classified.

8. **Question 2.** Include only volumes cataloged, classified, and made ready for use.

9. **Question 6.** Report number of volumes purchased. Include all volumes for which an expenditure was made during 1988-89, including volumes paid for in advance but not received during the fiscal year. Include monographs in series and continuations. If only number of titles purchased can be

u reported, please report the data and provide an explanatory footnote on p. 4 of the questionnaire. **Note:** This question is concerned with volumes purchased rather than volumes received or cataloged. Question 15 requests the expenditure for the volumes counted here.

10. **Questions 7-9. Serials**. Include duplicate subscriptions and only those government document serials that are cataloged, classified, and shelved as part of the general collection; do not include government documents serials that are housed in a separate government documents collection.

    Exclude monographic and publishers' series. A **serial** is

    > a publication issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies.

11. **Question 8.** If separate numbers of nonpurchased and purchased serials are not available, report only the total number of current serials received on line 9, and report **U/A** for lines 7 and 8.

12. **Question 10. Microforms**. Include number of reels of microfilm, number of microcards, and number of microprint and microfiche sheets. Exclude government document microforms.

13. **Questions 11-14. Personnel.** Report the number of staff in filled positions, or positions which are only temporarily vacant. Include cost recovery positions and staff hired for special projects and grants, but provide an explanatory footnote indicating the number of such staff. If such staff cannot be included, provide a footnote on p. 4 of the questionnaire. The number of FTE staff should be determined on the basis of the length of the work week in the reporting library. **Round figures to the nearest whole numbers**.

14. **Question 11**. Since the criteria for determining professional status vary among libraries, there is no attempt to define the term "professional." Each library should report those staff members it considers professional, including, when appropriate, staff who are not librarians in the strict sense of the term, such as computer experts, systems analysts, budget officers, etc.

15. **Questions 15-26. Expenditures**. Report all expenditures of funds that come to the library from the regular institutional budget and from other sources, such as research grants, special projects, gifts and endowments, and fees for service. Canadian libraries should report expenditures in both Canadian and U.S. dollars. To determine figures in U.S. dollars, divide Canadian dollar amounts by 1.2026, the average monthly noon exchange rate published in the Bank of Canada *Review* for the period July 1988-June 1989. **Please round figures to the nearest dollar.**

16. **Question 15**. Include here expenditures for volumes reported on line 6.

17. **Question 16**. Exclude monographic and publishers' series.

18. **Question 17**. Include all materials except monographs and current serials, e.g. microforms, backfiles of serials, charts and maps, audiovisual materials, manuscripts, electronic media, etc. If expenditures for these materials are included in lines 15 and/or 16 and cannot be disaggregated, please report U/A and provide a footnote on page 4.

19. **Question 18**. Include any other **materials funds expenditures** not included in questions 15-17, e.g., expenditures for bibliographic utilities, literature searching, security devices, memberships for the

purposes of publications, etc. Please list categories, with amounts, in a footnote on p. 4 of the questionnaire. Note: If your library does not use materials funds for non-materials expenditures--i.e., these expenditures are included in Other Operating Expenditures--**report 0, not U/A, on line 18.**

20. **Question 20.** Include only contract expenditures. If all binding is done in-house, state this fact and give in-house expenditures in a footnote on p. 4 of the questionnaire; do not include personnel expenditures.

21. **Questions 21-24.** Exclude fringe benefits. If professional and nonprofessional salaries cannot be separated, enter **U/A** on lines 21 and 22 and enter total staff on line 24.

22. **Questions 23-24.** Report 100% of student wages. Include federal and local funds for work study students, regardless of budgetary source of funds.

23. **Question 25.** Exclude expenditures for buildings, maintenance, and fringe benefits.

24. **Questions 27-28.** Include both original materials and photocopies in lieu of originals.

25. **Questions 29-30. Ph.D. Degrees.** Please note that only the number of Ph.D. degrees are to be counted. Statistics on all other advanced degrees (e.g., D.Ed., D.P.A., M.D., J.D.) are not included in this survey. If you are unable to provide a figure for Ph.D.s only, please note this in a footnote on p. 4 of the questionnaire.

26. **Question 30.** For the purposes of this report, Ph.D. fields are defined as the specific discipline specialties formerly enumerated in the form used by the U.S. Department of Education entitled, "Integrated Postsecondary Education Data System Survey, Postsecondary Completions," designated as ED (CS) Form G50-14P-C. Although the IPEDS form requests figures for all doctoral degrees, only fields in which Ph.D.s are awarded should be reported on the **ACRL** questionnaire. Any exceptions should be noted in a footnote on p. 4 of the questionnaire.

27. **Questions 31-34. Enrollment.** U.S. libraries should use the 1988-89 enrollment figures reported to the Department of Education on the form entitled "Integrated Postsecondary Education Data System, Fall Enrollment . . . 1988," designated as ED (CS) Form G50-14P-EF. The line and column numbers on the IPEDS form for each category are noted on the questionnaire. Please check these figures against the enrollment figures reported to ARL in 1988 to ensure consistency and accuracy. **Note:** In the past, the number of part-time students reported was FTE; the number now reported to IPEDS is a head count of part-time students.

28. **Question 35. Faculty.** Instructional faculty are defined as those members of the Instructional/Research staff who are employed on a full-time basis and whose major regular assignment is instruction, including those with released time for research. Please be sure number reported is equivalent to the number reported for 1987-88.

29. **Footnotes.** Reporting libraries are urged to record in the footnote section any information that would clarify the figures submitted, e.g., the inclusion of branch campus libraries. Explanatory footnotes will be included with the published statistics.

30. If you completed the ACRL Statistics Questionnaire in 1987-88, please compare those figures with the survey you have just completed. On occasion, an error will be detected because of an unusual difference between numbers submitted this year and those for the preceding survey. If an unusual change has occurred, please provide an explanatory footnote on p. 4 of the questionnaire.

31. Before returning the questionnaire, **please check all math.** Many follow-up telephone calls can be avoided if math errors are corrected before the questionnaire is submitted.

32. Return one copy of the questionnaire to the ACRL Office by **November 3, 1989.** If there are any questions about the procedures to be followed in completing these questionnaires, contact Mary Ellen Davis at the ACRL Office, 312-944-6780 ext. 287 or Toll-free: 800-545-2433; in Illinois 800-545-2444; in Canada 800-545-2455. Please be sure the library director has signed the questionnaire before it is returned to the ACRL Office.

September 18, 1989

Dear Library Director:

Enclosed are copies of the questionnaire for the *ACRL University Library Statistics 1988-89*. It is in the same format that was used for last year's compilation, i.e., it is the same format used by the Association of Research Libraries (ARL). ACRL has continued its practice of surveying those non-ARL institutions which are included in the categories of Research Universities I and II and Doctorate Granting Colleges and Universities I and II (see the Carnegie Foundation's *A Classification of Institutions of Higher Education*, 1987).

Normally, ACRL has compiled these statistics every second year in even numbered years. However, since the Department of Education *Integrated Postsecondary Education Data System* (IPEDS) has now begun collecting data in even numbered years, the ACRL Board of Directors felt that ACRL should shift its data gathering to odd numbered years. To ensure continuity of data gathering the ACRL Academic Library Statistics Committee recommended and the ACRL Board agreed that data should be gathered this year rather than waiting until 1991.

Two copies of the questionnaire are enclosed. One is intended to serve as a working copy. Please return one copy of the completed questionnaire to Academic Library Statistics, ACRL, 50 East Huron Street, Chicago, IL 60611 no later than **November 3, 1989.**

We have tried to make the instructions clear and unambiguous. If you have questions about how to complete the questionnaire please contact Mary Ellen Davis, ACRL Program Officer, at 800-545-2433. Comments and suggestions about the form or the program of gathering academic library statistics will be appreciated and should be addressed to Ronald P. Naylor, Assistant Director, University of Miami Libraries, PO Box 248214, Coral Gables, FL 33124.

Sincerely,

Ronald P. Naylor
